

Sun Peaks is Canada's second largest ski resort, amassing more than 135km of ski terrain. There is a great variety of slopes, with many suitable for all abilities. Sun Peaks tends to be quieter during the week, allowing visitors the freedom to explore the resort at ease. The ski resort has quick, direct access to lifts, with several fantastic ski-in ski-out accommodations. The charming Alpine village has the unique feature of being a 'ski-through', where visitors can ski straight from the mountain, through the town, without even taking skis off!
